

Installation of 200 SERIES Horizontal Mullion

1) Install Mullions

- Assemble the Glazing Base and Sidelight Glazing per Cross Section N.
- Mount the F Clips (2 each) shown in Joint Detail 11 & 30 to the Mullion on one face only.
- Mark the desired location of the Mullion on the Sidelight Glazing and on the Glazing Channel of the sidelight or relight.
- Position the Mullion between the Sidelight Glazing and Glazing Channel and secure one F Clip only to one of the vertical members.
- Check for level, adjust and secure the other F Clip.
- Install the remaining F Clips (2 each) on the opposite face.
- Snap in the Glazing Base Snap-in as shown in Cross Section N.
- Return to the Installation Instructions for the sidelight or relight.

2) Install Horizontal Mullion Trim (Install After Vertical Trim has been installed.)

- Locate the Horizontal Mullion Trim. (2 each pieces, square cut at both ends)
- Install per Cross Section N, keeping the Trim tight to both Vertical Trim members, per Joint Detail 11 & 30.
